DEALER NOTICE

AUGUST 15, 1973

Dear Dealer:

An adaptor is available which can be fitted to certain Moto Guzzi rear drive units to raise the oil level and this increases the quantity in the drive unit.

Rear drives suitable for this fitting can easily be identified by viewing the machine from the left side, to determine the following:

Where the level plug is located $3\frac{1}{4}$ inch from the sump gasket the adaptor can be fitted. If the level plug is more than $3\frac{1}{4}$ inch from the sump gasket and approximately level with the rear axle, the adaptor is not necessary.

The adaptor unit is available via the Parts Department as follows:

1	Adaptor	12351700	(C)
1	Bolt	95990065	(D)
1	Gasket	90714113	(E)
1	Gasket	10528900	(F)

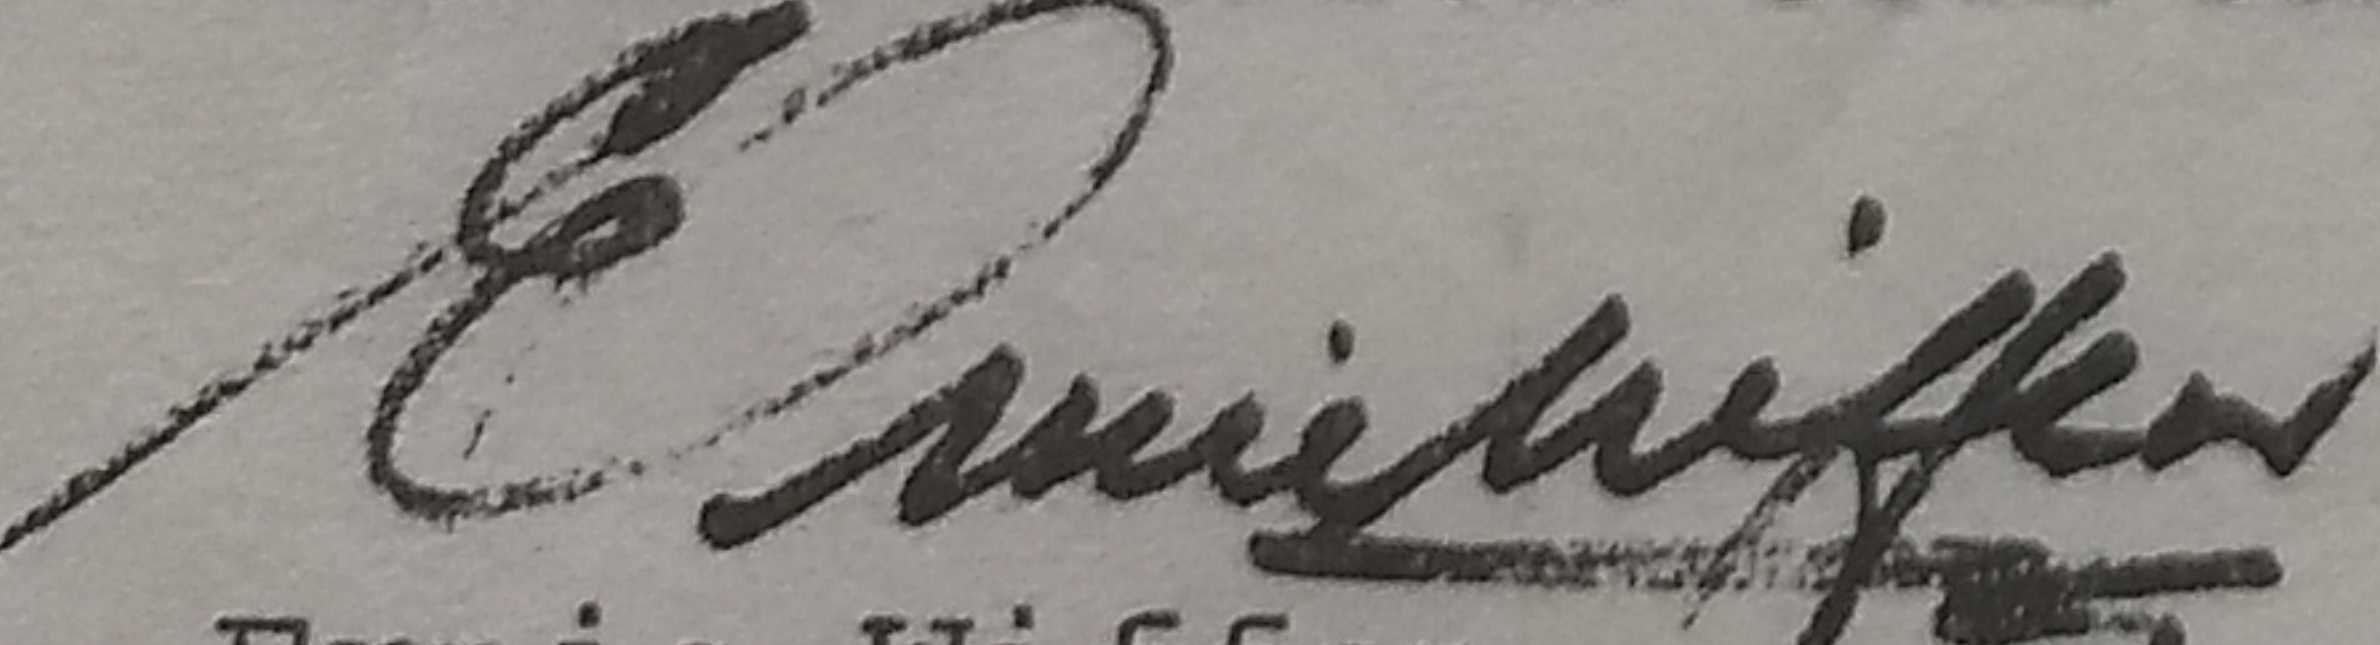

~~The adaptor is suitable only for rear drive units with the sump at the bottom of the drive casting.~~

Fitting Instructions:

1. Drain oil from drive box.
2. Fit adaptor using gaskets "E" and "F" between the hollow bolt head and adaptor and drive box.
3. Fill with oil to level plug "A".

Yours truly,
